1. The Information Disclosure Statement submitted by Applicant on August 21, 2003 has been received and fully considered.
2. The drawings are objected to because in Figure 4, element "83" should be changed from "WORD LINE" to --BIT LINE--, and element "82" should be changed from "MAGNETIC BIT LINE" to --MAGNETIC WRITE LINE--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In page 10, line 18, number "83" has been changed to --82--.

4. The following is an examiner's statement of reasons for allowance:

The closest prior art to the present invention is Okazawa (U.S. Patent No. 6,532,163).

Okazawa disclosed a non-volatile semiconductor memory device with magnetic memory cell array comprising a plurality of main word lines connecting through sub-word switching devices to a number of sub- word lines, a plurality of main bit lines being connected through sub-bit lines switching devices to the same number of sub-bit lines. Okazawa failed to show or suggest the limitation of a plurality of write bit lines substantially parallel to a plurality of read bit lines.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan T. Nguyen whose telephone number is (571) 272-1789. The examiner can normally be reached on Monday to Friday from 07:00 AM to 03:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David C. Nelms, can be reached at (571) 272-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
